

# Amir Nabizadeh

Cyber Security Engineer | DevOps Engineer

Innovative Cyber Security Engineer and Go Programmer with expertise in proactive threat hunting, vulnerability management, and incident response. Skilled in identifying and remediating security vulnerabilities, conducting penetration testing, and implementing security controls. Proficient in digital forensics and collaborating with cross-functional teams to ensure critical systems' confidentiality, integrity, and availability. Certified in CEH Cyber Security and LPIC1 LinuxOS. Experienced in cloud DevOps practices, including AWS and Azure DevOps. Designed and managed CI/CD pipelines, leveraging Terraform and CloudFormation for automation.
